- TOOL JOINT & DRILL COLLAR COMPOUNDS

PRODUCT DESCRIPTION

900 Wonder is a premium surface conditioner for ferrous metals. It provides a protective coating against rust, is used as a paint primer and is used to remove rust and corrosion. Other applications include use as a stain remover for porcelain, brick, concrete, vinyl, terrazzo and linoleum. Non-ferrous metals such as aluminum, zinc, brass, copper and bronze can also be treated with 900 Wonder to remove oxidation and corrosion. It is also excellent for treating metal prior to cold galvanizing.

Protective Coating: When used as a protective coating for metal surfaces, 900 Wonder stops the corrosion process by changing rust to an inactive state. Rust is turned into a dark protective coating, which resists further corrosion.

Paint Primer: 900 Wonder provides a superior bonding surface for coatings and paint that permits better adherence to the metal. It reduces the tendency of chipping and peeling. 900 Wonder fights against rusting and bleeding from underneath finished surfaces, eliminating the conditions that reduce paint and coating service life.

Rust Remover: 900 Wonder removes rust on tanks, barges, tools and equipment. Frozen bolts and nuts can be cleaned and then broken out by applying 900 Wonder to the affected areas. It also removes rust from chrome, iron and metals.

BENEFITS

- Stops corrosion
- Converts rust to useful metallic surface
- Provides superior bonding surface or primer for paint
- Removes corrosion from non-ferrous metals such as aluminum and zinc
- Removes stains from porcelain, brick, concrete, vinyl, terrazzo and linoleum

TYPICAL OBSERVATIONS

Form	Liquid
Color	Transparent Emerald Green
Odor	Mild
Density, lb/gal @ 77°F (25°C)	9.60
Freezing Point	-25°F (-31°C)
Minimum Application Temperature	-10°F (-23°C)
Flash Point, ASTM D-92	None
pH	>1
Suspended Solids	Nil
Sulfates	Nil
Solubility in Water	Complete
Shelf Life (unopened container)	Two years

APPLICATION

Because of the universal existence of rust, corrosion and stains, the applications of 900 Wonder are virtually unlimited. 900 Wonder removes rust from any ferrous metal surface, ranging from hand tools to giant tanks and barges. 900 Wonder is often used to loosen rusted nuts and bolts and works exceedingly well when used to clean and protect welded surfaces that are so vulnerable to rust. 900 Wonder can also be used to remove stains from nonmetal surfaces such as porcelain, terrazzo, brick and other masonry surfaces but should be mixed with an equal amount of water before application to these materials. 900 Wonder can also remove rust from chrome surfaces, iron lattice and other types of open work, which must withstand long exposure to outside elements.
