- RUST & CORROSION INHIBITORS
- THREAD LOCKING COMPOUNDS
- VALVE LUBRICANTS & SEALANTS
- TOOL JOINT & DRILL COLLAR COMPOUNDS

PRODUCT DESCRIPTION

890N WONDER II is a clear, premium surface conditioner for ferrous metals. It provides a protective coating against rust, is used as a paint primer, and to remove rust and corrosion.

PROTECTIVE COATING: When used as a protective coating for metal surfaces, 890N WONDER II stops the corrosion process by changing rust to an inactive state. Rust is turned into a dark protective coating, which resists further corrosion.

PAINT PRIMER: 890N WONDER II provides a superior bonding surface for coatings and paint, which permits better adherence to the metal. It reduces the tendency of chipping and peeling. 890N WONDER II fights against rusting and bleeding from underneath finished surfaces, eliminating the conditions that reduce paint and coating service life.

RUST REMOVER: 890N WONDER II removes rust on tanks, barges, tools, and equipment. Frozen bolts and nuts can be cleaned and then broken out by applying 890N WONDER II to the affected areas. It also removes rust from chrome, iron, and metals.

BENEFITS

- Forms protective coating
- Paint primer
- Removes rust and corrosion
- Bonding effect
- Metal conditioner
- Extends service of paint or coating
- Stain remover on porcelain, brick, concrete, vinyl, terrazzo, and linoleum
- Removes rust and oxidation from nonferrous metals
- Treats metal for cold galvanizing

TYPICAL OBSERVATIONS

Form	Liquid
Color	Clear
Odor	Mild
Specific Gravity @ 77°F (25°C)	1.16
Density, lb/gal @ 77°F (25°C)	9.73
Freezing Point	-25°F (-31°C)
Minimum Application Temperature	-10°F (-23°C)
Flash Point, ASTM D-92	None
pH	>1
Suspended Solids	Nil
Sulfates	Nil
Solubility in Water	Complete
Shelf Life (unopened container)	Two years

APPLICATION

Use 890N WONDER II as a protective coating, paint primer, or rust remover. 890N WONDER II may also be applied as a stain remover for porcelain, brick, concrete, vinyl, terrazzo, and linoleum. Nonferrous metals such as aluminum, zinc, brass, copper, and bronze can also be treated with 890N WONDER II to remove oxidation and corrosion. It is also excellent for treating metal prior to cold galvanizing.

Apply 890N WONDER II by spraying, brushing, rolling, mopping, or dipping.
