# PROTEKTO-COAT®

## 910

### INTERNAL PIPE COATING

#### PRODUCT DESCRIPTION

Protekto-Coat® 910 is a balanced molecular polymer with corrosion inhibitors specially formulated to provide internal corrosion protection to metal surfaces of tubular goods.

Protekto-Coat® 910 leaves a slightly tacky film that will not dry, crack, gum up, ball up, or reduce the ID of the pipe. The corrosion inhibitor package in this coating will provide long term protection on oilfield tubular goods provided the pipe is properly cleaned, coated, and thread protectors are installed. Protekto-Coat® 910 has no offensive odor like fish oil and is easily applied with conventional spray equipment.

#### BENEFITS

- Slightly adhesive but will not reduce ID
- Does not gum
- Prevents rusting
- Economical
- Safe and easy-to-use
- No offensive odor
